

Antrim Township Industrial Pretreatment Program
Standard Operating Procedure No. 1
Local Limits Implementation

Issue Date June 2017

Revision No. 0

Scope

This procedure describes how the Township incorporates local limits and any other Township requirements from the Township's Sewer Use Ordinance (SUO) into IU permits.

Overview

Upon adoption of the local limits or any other relevant changes to the Township SUO, the Pretreatment Coordinator will review all IU permits and revise if necessary.

Procedures

Documentation

Steps

- ☐ 1. The Township adopts new or revised local limits; a copy of the Ordinance is provided to the Pretreatment Coordinator.
- ☐ 2. The Pretreatment Coordinator reviews the new local limits against the current limits in all IU permits. This includes all pollutant for which the Township has granted a monitoring waiver.
- ☐ 3. IU permits are revised to include all local limits, including all pollutants of concern.
- ☐ 4. Draft permits are provided to Township engineer to verify all necessary revisions have been included.
- ☐ 5. Once engineer has reviewed and approved the draft permits, copies of the draft permits are provided to the IUs for review and comment.
